

High quality **laundry and washer disinfector solutions** for dental practices

from Eschmann and Miele

Quality is at the heart of everything Eschmann and Miele provide. All Miele products are designed, built and tested to operate in a busy commercial environment for a minimum of ten years. For example, for our laundry washers that's 30,000 cycles, which equates to 8 cycles a day, every day, for ten years. You would typically replace a domestic washing machine 6 times in that period for the same use.

Combined with Care & Cover service offering from Eschmann and Miele, you can have peace of mind that your equipment is compliant, running with optimal efficiency and minimal downtime. Care & Cover provides all the technical support you need through our nationwide team of engineers, and includes unlimited breakdown cover, call-outs, parts and labour.

Washer disinfector features:

- ✓ Reliability and longevity
- ✓ Fast wash cycle times
- ✓ WRAS approved
- ✓ Large capacity, can fit up to 360 instruments
- ✓ Integrated water softener
- ✓ Quiet operation

Laundry washers and dryers features:

- ✓ Reliability and longevity
- ✓ Tested to 30,000 wash cycles
- ✓ Fast cycle times
- ✓ WRAS approved
- ✓ Stackable
- ✓ Easy to use

Specifications: PG8581 washer disinfector

PG8581
Washer disinfector
